Due to COVID-19 the ACR is performing **virtual** Validation Site Surveys for DMAP accredited sites. We will also perform them in person once travel can safely be resumed.

When your accredited site has been chosen for a Validation Site Survey, notification will be sent to the Facility and Modality Supervising Physician emails as well as the Facility Administrator email listed in the accreditation database. The notification will include the following steps:

- Modality login person(s) should log into the ACRedit database and verify or update all information (contacts, address, unit information and personnel) to ensure it is current.
- Facility Administrator or technologist contact(s) should send an email to vss@acr.org acknowledging receipt of this notice and include the Facility ID# from the notification email.
- Access the VSS toolkit at http://www.acraccreditation.org/resources/validation-site-survey and begin updating/gathering the required information. These documents will help you organize your information for the site survey.

At some point within 90 days from email notification, an ACR staff member will contact the site to perform the survey via your platform of choice (Zoom, GoTo Meeting, Teams, etc.) on a date stipulated by ACR.
